UPDATE: 2009-04-07

We have fixed the system, so now you can input Chinese characters in the remarks text box. We are working on showing your order history and order status for each item, so that you can track the progress of each item's status. More features will be coming soon. Please let us know if you encounter any bug or problem, we will get it fixed ASAP. Thanks!

UPDATE: 2009-04-02

The [Shoppng Cart](#) is LIVE now! Once you have completed your [shopping spree](#) (What? Can't stop? Relax, you are not the only one), you can submit the order to our system. Instruction is at the bottom of the shopping cart.

You don't have an account yet? [Register now](#) ! It's free anyway!

Below is our original update:

Good news! As of this moment, the [Shopping Cart](#) is partially functional. You can access it under "User Menu" after you have logged on. If you are a new visitor, you are welcome to [sign up](#), no need to pay a dime!

Here is a features list of the Shopping Cart:

- Simply add items to the cart by pasting the item URL in the Add Item form

Shopping Cart Update

- Image will be downloaded to our server
- Description will be captured
- Price will be captured correctly (If discount is available, you get it too!)
- Intelligently select the best domestic shipping choice for you
- Option to put in remarks, for choices like Color, Sizes, etc
- For multiple items, domestic shipping is only added once. (Subject to adjustment manually by us, if seller charges more for multiple items)

If you have a nagging feel that some feature is sorely needed, do let me know! Of course, if something breaks, let me know too!

I know, I know.. it is exciting... but the catch is we are still working on the submit order part. I expect it to be ready by tomorrow.

Oh BTW, go pour your hearts out in our [forum](#) ! Share your [crazy finds](#) from [Taobao](#) there, we'd love to know!
